Regarding the Enefit Green AS offshore wind farm
project's environmental permit

On 26 November 2025, by letter No.6-3/25/5114-2, Estonia informed Finland that on 30 October 2025 the Estonian Environmental Board has issued an environmental permit for special use of water for the Enefit Green AS offshore wind farm project (order No. DM-130049-38; hereinafter *water permit*). The water permit in Estonian has been sent to Finland. Also an overview document of the EIA procedure (transboundary consultations) and the water permit in Finnish – prepared by the developer – has been provided.

As the water permit in question is a very voluminous document, additional time was necessary for the translation procedure. The English translation has now been completed by the developer. Hereby we are sending the water permit in English: the permit form (*permit*) and the permit order (*order*) – enclosed in Annex 1 and 2, respectively.

Sincerely Yours,

(signed electronically)
Birgit Parmas
