Regarding the environmental impact assessment of
the additional area of Utilitas Wind OÜ Saare-Liivi
offshore wind farm project in the Gulf of Riga

Hereby the Ministry of Climate of Estonia is informing the affected Parties that the developer Utilitas Wind OÜ has prepared the environmental impact assessment (EIA) report of the additional area¹ of the Saare-Liivi offshore wind farm project in the Gulf of Riga. The EIA programme of the project was sent to the affected Parties on 11 July 2023 (Ministry of Climate, letter No. 16-3/23/1640-4).

The developer has translated the EIA report into English, also profound summaries in Latvian, Lithuanian, Swedish and Finnish have been prepared. All the forementioned documentation has been enclosed. The EIA report (together with annexes) in Estonian can be found in the document register of the Consumer Protection and Technical Regulatory Authority².

In Estonia, the public display of the EIA report takes place from 14 October to 16 November 2026. The public hearings will take place on 30 November 2026 (Kihnu Island, Kihnu Community Center, starting time 11.00).

Estonia kindly asks the affected Parties to respond by 10 December 2026 (e-mail: info@kliimaministeerium.ee) at the latest, and to:

- provide comments concerning the assessment of the environmental impacts of the project affecting your country;
- submit the comments you might receive from the public and authorities in your country regarding the EIA report.

¹ The Ministry of Climate has sent the EIA report of the initial area of Utilitas Wind OÜ Saare-Liivi offshore wind farm project in the Gulf of Riga to the affected Parties for commenting on 17 March 2025 (letter No. 16-3/25/1197-3). The superficies license for the forementioned project has been provided to the affected Parties on 12 March 2026 (letter No. 16-3/25/1197-13).

Description of the project

The purpose of the proposed activity is to construct an offshore wind farm in the additional area of the Saare-Liivi offshore wind farm, including the offshore infrastructure necessary for its operation, for renewable energy generation. Under main alternative 3, which forms the basis for the impact assessment, up to 40 wind turbines with a total capacity of up to 800 MW will be constructed in the 57,1 km² additional area.

The proposed additional area of the Saare-Liivi offshore wind farm is located in suitable area No. 1 designated for wind energy development under the Estonian Maritime Spatial, in the coastal water body of the central part of the Gulf of Riga, adjoining the initial area of the Saare-Liivi offshore wind farm. If both projects are implemented, the initial area and the additional area of the Saare-Liivi offshore wind farm would likely constitute a single integrated wind farm.

Contacts information

Developer: Utilitas Wind OÜ – Ms Kristiina Nauts, kristiina.nauts@utilitas.ee.

Decision-maker: Consumer Protection and Technical Regulatory Authority – Ms Adeele Vesingi, adeele.vesingi@ttja.ee.

Transboundary EIA procedure: Ministry of Climate – Mr Rainer Persidski, rainer.persidski@kliimaministeerium.ee.

Sincerely Yours,

(signed electronically)

Birgit Parmas
